Appendix 13: Dusk-to-Dawn Light Application

SCENIC RIVERS ENERGY COOPERATIVE DUSK-TO-DAWN AGREEMENT

231 N. Sheridan Street, Lancaster WI (608) 723-2121 (800) 236-2141 Fax (608) 723-2688

Location _____

Date _____

Dusk-to-Dawn lights are available to all Scenic Rivers Energy Cooperative (SREC) members, subject to the established rules and regulations of the Cooperative. Service is a Dusk-to-Dawn, automatically-controlled, LED light.

The kilowatt-hours used to operate a Dusk-to-Dawn light are not metered, but have a flat, daily rate. This rate takes into consideration any possible downtime and is, therefore, not open to adjustment. Rates and minimum charges are in accordance with SREC current rate schedule, which is subject to change.

Line workers must handle power line maintenance and repairs first; should your Dusk-to-Dawn light not work; it will be repaired in as timely a manner as possible.

SREC Dusk-to-Dawn lights are normally installed on existing cooperative poles where electric service is available. If a transformer is not installed near the light location one can be added, but additional charges may apply. If a new pole is needed, SREC can provide it for a fee of \$283.25 plus \$3.50 per foot for the line extension from SREC source of power (as determined by SREC) to the Dusk-to-Dawn light pole. Extensions cannot be made from the meter socket. For underground installations **performed after November 1**, additional charges and requirements apply for winter conditions.

The member is responsible for providing SREC with the desired size, location, and direction of the Dusk-to-Dawn light; and, if necessary, pole location. If, after initial installation, a request is made to either upgrade or downgrade the light size or change the direction of the light on the pole, a \$79.29 charge may apply. Any such requests must be received within 30 days from the date of installation or account change. If at any time the Dusk-to-Dawn light pole is requested to be relocated, a fee of \$283.25 plus \$3.50 per foot for the line extension will apply.

In requesting a Dusk-to-Dawn light, a SREC member agrees to pay for the service for a minimum of one year. Should the member choose to have the light removed within the first twelve months, one full year of service will be paid in order to help cover the installation, maintenance, and retirement costs incurred by SREC. Repairs to the Dusk-to-Dawn light due to vandalism will be covered only on the first occurrence. Any vandalism after that will result in the light either being removed or the repairs will be charged at the current time and material rate.

TRENCH MARKING AGREEMENT: The below member requests that SREC dig a trench on the member's property located at the above location for installation of underground electrical wire to serve a SREC Dusk-to-Dawn light. Prior to construction, Scenic Rivers will mark the proposed trench route with white flags and/or paint. SREC will call Digger's Hotline for marking of existing underground public utilities, including electric, telephone, natural gas, and cable TV. ***It is the member's responsibility to physically mark the location of any and all other obstacles that lie underground within 10 feet on either side of the proposed trenching route.*** Such obstacles include, but are not limited to septic and sewer systems, buried wires for out-buildings or decorative lighting, and LP gas lines. The member shall mark the location of all obstacles with stakes or flags or by painting the ground. ***The member accepts responsibility*** for damage to any such underground obstacle that the member fails to mark.

I request the installation of the following light(s): 74-Watt LED Quantity: _____

Fees for the new light that requires a pole and line extension are due prior to installation of the light and will be calculated by a SREC representative.

I hereby understand and agree to the above rates and conditions.

Signature

Indicate your desired location for the Dusk-to-Dawn on the SREC pole:
