Free Energy Saving Products Now Available to Wisconsin Renters

MADISON - Focus on Energy's popular offering that ships free energy-saving products to Wisconsin homeowners is now available to renters and condo owners.

"This year our Simple Energy Efficiency offering expands to all rate-payers of utilities that participate in Focus on Energy," said Casey Langan, Focus on Energy spokesman.

Funded by 108 electric and natural gas utilities, Focus on Energy has worked with eligible Wisconsin residents and businesses to install cost effective energy efficiency and renewable energy projects since 2001.

There are six different packs to choose from. They include items such as light-emitting diode (LED) light bulbs, high-efficiency showerheads, pipe insulation, and advanced power strips for home offices and entertainment centers. Participants can order one pack per household, once every three years.

Order your free pack online at focusonenergy.com/simple or call 800.230.4701. Packs are shipped for free to your doorstep within four to six weeks. Please have your electric and natural gas utility account numbers available when ordering.

"Whether switching to LED lightbulbs or plugging electronics into an advanced power strip, these products help Wisconsinites save energy and money," Langan said. "These Simple Energy Efficiency packs are just one way Focus on Energy benefits our state's economy, reduces energy waste, and conserves resources."

Stay Back!

Know the difference between types of lines and wires. If you see a downed electric line, be aware that it could be live and dangerous!

Electric Wire

Electric wires are larger and can be easily identified by the three separate twisted wires, one being uniquely silver or uninsulated.

Cable Wire

Cable lines are round and look similar to the coaxial cable that connects to the TV in your home.

Phone Wire

Telephone wires are typically smaller, flat wires.

DO NOT TAMPER WITH YOUR ELECTRIC METER

Meter tampering can result in electric shock, is illegal and increases electricity rates for other co-op members.

- ⊘ Never break a meter seal.
- ⊘ Never open a meter base.
- ⊘ Never remove a meter or alter an entrance cable in any manner.

If you know or suspect that someone has tampered with their meter, please contact us immediately.

Energy Efficiency Tip of the Month

Consider insulating your hot water pipes. Doing so can reduce heat loss, allow you to lower the temperature setting and save an additional 3 to 4 percent per year on water heating.
